

A PCA plot showing the first two principal components, PCO 1 (49 %) on the x-axis and PCO 2 (22 %) on the y-axis. The plot displays trajectories for four years: 2013, 2015, 2016, and 2018. The 2013 trajectory is represented by a purple circle at approximately (-0.5, 0.1). The 2015 trajectory is represented by a red circle at approximately (0.25, -0.1). The 2016 trajectory is represented by a purple circle at approximately (0.05, -0.2). The 2018 trajectory is represented by a purple circle at approximately (0.0, 0.1). Arrows indicate the direction of the trajectories from 2013 to 2018.
